Please bring this catalogue
with you to our sale

Welcome to our 29th Annual On-Property Sale.

We are pleased to be offering 130 Quality Poll Dorset Rams including 18 Feature Rams.

We are excited to have the first progeny from Derrynock 20-23 and 800-23. They are outstanding rams performing well on Lambplan with high indexes and they are structurally correct.

Our aim at Ulandi Park is to provide you with solid, reliable genetics to advance your prime lamb enterprise and maximise your returns, by specifically targeting early maturity and yield in your prime lambs.

We believe the high yielding and early maturing ability of the Ulandi Park Poll Dorset Rams will continue to benefit your enterprise. We enjoy hearing client feedback on lamb yield returns, in particular the comparisons between live and dressed weights that Ulandi Park progeny achieve.

Visual Excellence together with Lambplan Performance - The Ultimate Combination -

The sale rams have been drenched (Triguard), vaccinated (GlanEry4 B12) and are ready for work. Ulandi Park is Brucellosis Accredited (#500) and MN3 Status for Johnes (S71).

We welcome your inspection at any time by appointment.

Please contact Clayton (0408 852 927) or Charles (0499 193 661) for assistance with ram selections if required.

Combined selling agents are Elders, Nutrien and Spence Dix & Co.

Nutrien - Gordon Wood 0408 813 215 or Greg Beaton 0428 847 510

Elders - Tony Wetherall 0427 390 001 or Conor Lamond 0455 551 028

Spence Dix & Co - Joe Scammell 0429 112 664 or Daniel Doecke 0458 748 262

We look forward to seeing you on sale day - Thursday 24th Sept, 1pm.

Please Note - Ulandi Park retains 50% rights on any semen sold from all stud rams.

Lambplan

Lambplan data should be used in conjunction with visual assessment in all circumstances.

Ulandi Park Poll Dorset rams are bred to meet the sucker market with early maturing lambs. Weaning weight (Wwt) measurements at 3 months of age reflect this. Lambplan have removed Wwt measurements from index calculations and only include Pwwt measurements which leads to a later maturing lamb.

We encourage you to focus on the individual growth and muscle traits that best suit your enterprise.

At Ulandi Park all the commercially relevant data is collected up to 6 months of age. This actual data is the most relevant to your prime lamb enterprise and we see the benefits of this in our own commercial operation.

Growth is weight → Weight = Dollars

Weight = meat

Meat = higher yield = more dollars in your pocket

Notes:

BT = Birth type. (s=single, tw = twin, trp = triplet, qd = quad)

Bwt = Birth Weight

Wwt = Weaning weight

Pwt = Post Weaning weight

Pfat = Post weaning fat

Pemd = Post weaning eye muscle depth

TCP = Terminal Carcase Production Index
